Strategies for Sustainable . Forest Management . USTAINABLE FORESTRY IS. widely discussed and almost universally desired, but tangible . standards, goals, targets, or thresholds to evaluate sustainability are often defined vaguely. Identifying such standards is complicated by the diversity of forests, the diversity of objectives

Strategies for Sustainable Forest Management

forest areas, such as in the northeast Amazonian region, where forest dieback is expected to reach enormous proportions due to reduced availability of water, in combination with unsustainable land use practices. Provision of forest ecosystem services and goods will be altered by these changes, posing a number of new challenges to forest managers.

Forest Management and Climate Change: a literature review

Marketing in the forest sector has evolved, responding to new challenges in the business environment. Marketing philosophies have changed from production oriented to marketing oriented and a new era is beginning: responsible forest industry — responsible marketing. Since the 1950s the customer has been the driving force behind marketing thinking.

MARKETING OF FOREST PRODUCTS IN A CHANGING WORLD* - Scion

Red oak and white oak are often looked at as the primary market and economic indicators in the hardwood industry. Current pricing for both red and white oaks is on the rise. White oak lumber (#2/Btr) prices are 3% higher than what was reported in July 2017 and red oak prices are almost 6% higher.
