Basic clean room requirements What is a clean room? A clean room, in my mind are a combination of engineering design, fabrication, finish and operational controls (control strategy) that are required to convert a “normal” room to a “clean room”.

Basic clean room design requirements and considerations

The technological infrastructure that makes these changes possible is the temperature-controlled supply chain, which dates back about 150 years, to horse-drawn “iceman” carriages. Today’s systems use digitized controls that customize cold temperatures in warehouses and trucks for a wide variety of fresh and frozen foods.
