How often should forklift forks be inspected? Daily: Operators should make visual inspection of forks during the pre-start-up check, with special attention for damage, bending distortions and cracks. Six months: A thorough inspection of forks should be done every six months, preferably by a trained individual wear caliper, to check for any cracks and distortion.

## **LIFT TRUCK OPERATOR'S DAILY/WEEKLY INSPECTION REPORT**

A unit load device (ULD) is a pallet or container used to load luggage, freight, and mail on wide-body aircraft and specific narrow-body aircraft. It allows a large quantity of cargo to be bundled into a single unit. Since this leads to fewer units to load, it saves ground crews time and effort and helps prevent delayed flights.
