fossil crinoids pdf

Most modern crinoids, i.e., the feather stars, are free-swimming and lack a stem as adults. Examples of fossil crinoids that have been interpreted as free-swimming include Marsupitsa, Saccocoma and Uintacrinus. In 2005, a stalked crinoid was recorded pulling itself along the sea floor off the Grand Bahama Island. While it has been known that stalked crinoids move, before this recording the ...

Activity Two: The Classic Fossil Lab - Simple Format

A living fossil is an extant taxon that closely resembles organisms otherwise known only from the fossil record. To be considered a living fossil, the fossil species must be old relative to the time of origin of the extant clade. Living fossils commonly are species-poor lineages, but they need not be.

List of animal phyla is a list of the major groups of animals usually classified as a phylum. Modern sources have been used: the list is different from that of Linnaeus or Cuvier. A list of this type may be arranged alphabetically; equally it might be arranged according to evolutionary relationships.

The 2nd Edition of Oceans of Kansas - A Natural History of the Western Interior Sea will be published in September, 2017. The updated book will be larger, with more figures, descriptions of new discoveries in the past 12 years, and an in depth look at the history of Late Cretaceous paleontology in Kansas.

Oceans of Kansas Paleontology

Die meisten Seelilienarten sind mit einem Stiel am Meeresboden befestigt und tragen am oberen Ende einen mit Plattenkränzen aufgebauten Kelch, welcher den Weichkörper des Tieres schützt. Vom Kelchrand aus verzweigen sich zunächst fünf Arme (fünfstrahlige Symmetrie). Durch weitere Teilung der Armbasen entstehen 10- oder auch 20-armige Kronen.

L'estinzione di massa del Permiano-Triassico (P-Tr), detta anche estinzione del Permiano, nota informalmente in inglese anche come il Great Dying (la Grande Moria in italiano), fu un'estinzione di massa che avvenne circa 251,4 milioni di anni fa, facendo da limite tra il periodo geologico Permiano e Triassico. Fu il più grave evento di estinzione di massa che si sia mai verificato sulla ...
