

FOSSILIZATION IN ADULT SECOND LANGUAGE ACQUISITION

fossilization in adult second pdf

Interlanguage fossilization is a phenomenon of second language acquisition (SLA) in which second language learners turn linguistic features that are correct in their first language into permanent errors in the way they speak and write the new language. In other words, they develop and retain their own, personal linguistic system that is self-contained and different from both their first ...

Interlanguage fossilization - Wikipedia

An interlanguage can fossilize, or cease developing, in any of its developmental stages. Fossilization is the process of 'freezing' of the transition between the L1 and L2, and is regarded as the final stage of interlanguage development.
