Jerome Saltzer and Michael Schroeder were the first researchers to correlate and aggregate high-level security principles in the context of protection mechanisms [Saltzer 75]. Their work provides the foundation needed for designing and implementing secure software systems. Principles define effective practices that are applicable primarily to architecture-level software

Design Thinking is a design methodology that provides a solution-based approach to solving problems. It's extremely useful in tackling complex problems that are ill-defined or unknown, by understanding the human needs involved, by re-framing the problem in human-centric ways, by creating many ideas in brainstorming sessions, and by adopting a hands-on approach in prototyping and testing.

In the Art and Design Foundation program, students gain practical, creative and critical thinking skills in art and design. Students develop their portfolios throughout this studio-based curriculum, integrating a variety of analog and digital projects. The portfolio is designed to support students in their application to both diploma and degree level art and design programs.
