Introduction. The incidence of oropharyngeal squamous cell carcinoma is increasing rapidly in high-income countries,1, 2 reaching epidemic proportions in some estimates. 3 This increase has been attributed to a rise in human papillomavirus (HPV) infection. HPV-positive oropharyngeal squamous cell carcinoma is considered to be a distinct disease entity from HPV-negative head and neck cancer.

Introduction. Acute respiratory distress syndrome (ARDS) is a severe form of acute lung injury (ALI), which has up to a 50% risk of mortality. Pathologically, ARDS is characterized by diffuse alveolar damage, which is created by abnormal alveolar-capillary permeability, resulting in an influx of protein and fluid into the alveoli and interstitial spaces.

Background. Stress-Induced Cardiomyopathy (SCM), also known as Takotsubo Cardiomyopathy or Apical Ballooning Syndrome, is an acute, transient and non-ischaemic cause of left ventricular dysfunction often precipitated by periods of stress. Diagnosis often follows evidence of left ventricular hypokinesia despite a normal coronary angiography.
